Merchant Application Form

Minimum Technical Requirements for Installation and Use of POS Terminals:

I. Requirements to the communication lines:

For communication with the authorization center, the POS terminal device works in a standard manner, through the use of:

1. Embedded GPRS modem (The BANK provides a GPRS/CSD SIM card), or

2. Standard Internet connection, as the following technical means should be ensured at the place of installation:

2.1. An available socket of RJ45 type or a router port at a distance no longer than 1.5 m from the place of installation of the POS terminal device.

2.2. Internet connectivity.

2.3. The router should support DHCP (Dynamic Host Configuration Protocol. A communication protocol, through which a computer, computer-type device, router or any other kind of device, using an IP address, can request an Internet address from a server, which - on its part - owns specific space of IP addresses for distribution.)

II. Requirements to the power supply:

1. The terminal device works at a nominal electricity voltage of 220V \pm 10%. Upon interference in the power supply, it is recommended to use UPS systems.

2. The power cord should be connected to a properly grounded socket of the "SCHUKO" type.

3. The socket has to be at a distance, no longer than 1.5 m from the place of installation of the POS terminal.

III. Climate requirements:

1. The POS terminal device is not waterproof and dust-proof.

2. The place of installation of the terminal device has to be so chosen, so that the device would be protected from direct sunlight and heat sources.

3. The terminal device should not be used in places with high temperature, dust, humidity or evaporation of chemicals.

4. Installation of the terminal device in places, where there are powerful electric consumers or sources of electric interference, should be avoided.

Merchant's Declaration Statement:

By virtue of Art.37 of the Competition Protection Act I hereby state my irrevocable consent to the following: I grant to UBB AD the right of access to my industrial or trade secrets or to those of the company I represent. The Bank may conduct research and analysis of those industrial or trade secrets in view of the pre-contractual and/or contractual relations between us, conditioned on UBB's observance of the banking and trade secrecy.

I hereby state that:

- I acknowledge the truthfulness and accuracy of the information, provided by me.

- I grant my consent to the Bank to refuse the installation of a virtual POS terminal without stating a reason for the refusal.
- The legal entity's activity is in compliance with the requirements of the Bulgarian legislation.
