

Information for investors

The KBC Group Remuneration Policy is a framework for a sound remuneration practice within KBC Group worldwide in line with the corporate sustainability strategy and considering the European and different national legislations aiming sustainability (including article 5 of the Disclosure Regulation).

The KBC Group Remuneration Policy aims to ensure consistency with and to promote sound and effective risk management (e.g. “sustainability” is a specific parameter for the evaluation of KBC Senior Management).

Furthermore, the KBC Group Remuneration Policy aims to prevent incentives for excessive risk taking and ensures that the payment of variable remuneration is aligned with the long-term interests of KBC Group (e.g. Variable remuneration should not induce risk-taking in excess of the risk appetite of the different entities of the KBC Group and where relevant, be based on risk- and liquidity-adjusted profit, not on gross revenues. Additionally, ex ante and ex post risk adjustments to variable remuneration are possible in order to guarantee the sustainability strategy).
